Option 4 ID : 630680378407

Status : Answered

Chosen Option : A

Marks : 0

Comprehension:

Read the given passage and answer the questions that follow.

Next door to the gymnasium was a small shed in which we were allowed to keep caterpillars. We made boxes for them in the carpenter's shop with glass fronts and air-holes; then we bought the eggs or chrysalis from shops that sell such things. Richer boys bought rarer examples and when it was time and this fantastic life came out, we were kept busy getting leaves to feed them, taking care these were dry or they would fall sick and if they did, they died. Then, when they were ready to become cocoons, we would be getting sawdust for some kinds, so they might spin their spittle into sawdust tombs cemented hard. We never had lectures about them. They were pleasure unalloyed. Again, they let us cut laurel up to mix with water in jam jars and this let off fumes to gas any butterfly we caught. It was thought less cruel to use gas than to stick them on pins.

SubQuestion No : 196

Q.196 Where could they keep their caterpillars?

Ans A. In the carpenter's shop

B. In the gymnasium

C. In a shed

D. In a house
